

# OG-2000 Oxygen Generator

2000 SCFH (943.89 LPM) @ up to 55 PSI (3.8 bar) - Stand alone or part of complete Oxygen Generator System (OGS)

*"The industry standard, state-of-the-art, PSA twin tower generator"*

## AMERICAN-MADE, DEPENDABLE, INDUSTRIAL STRENGTH O<sub>2</sub> GENERATOR

NOVAIR's industry standard oxygen generators utilize the longstanding, highly safe PSA (Pressure Swing Adsorption) process that separates gases in the air, safely ejecting nitrogen while leaving high purity oxygen for a variety of medical and industrial applications. Quickly start producing your own oxygen in-house for just the price of electricity. End O<sub>2</sub> delivery forever while ensuring you always have 93% +/-3% oxygen concentration at up to 55 PSI pressure, wherever and whenever you need it.

Durable "twin tower" tanks filled with zeolite sieve to separate air

Customized output options with ability to create a comprehensive "Oxygen Generating System (OGS)" to meet your specific needs

Clear constant oxygen concentration monitoring readout dials with auto 'continuous' switch. Optional HMI digital touch-screen interface also available.

### ADVANTAGES:

- **Savings** - Get a large return on investment in mere months
- **Autonomy** - End delivery, free yourself from constant O<sub>2</sub> rate hikes
- **Reliability** - Works tirelessly in many settings, low maintenance
- **Safety** - No dangerous cylinder transport or worker's comp scares
- **Eco-friendly** - Green technology that lowers your carbon footprint

### KEY FEATURES:

- Produce up to 2000 standard ft<sup>3</sup> per hour of O<sub>2</sub> in-house, for less
- Output of 93% +/-3% oxygen concentration, continuous flow setting
- Expertly-sealed durable 'twin tower' zeolite sieve beds
- Reliable leading-edge PSA tech, quality-tested, built to last
- Extremely low power consumption, plugs into any 115 VAC power outlet, with 230 VAC input power available at no additional cost
- Worry-free safety features built-in, easy to monitor and maintain
- Can be configured into tailored 'oxygen generating system' (OGS)

SAVINGS

AUTONOMY

RELIABILITY

SAFETY

ECO-FRIENDLY

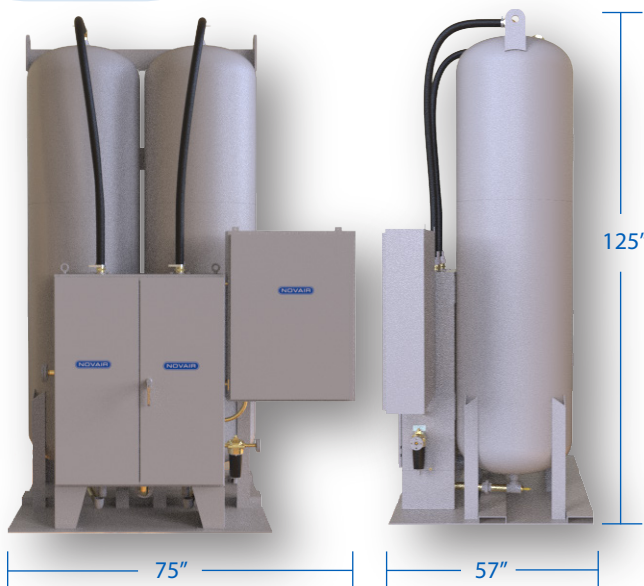

OG-2000

Compact skid mount prevents accidents

Compatible with any normal outlet to plug in and start making O<sub>2</sub> for much less than delivery

# OG-2000 OXYGEN GENERATOR

## PRODUCT DATA SHEET

### OG-2000 TECHNICAL DATA

Maximum oxygen flow	2000 SCFH (943.89 LPM) (56.64 Nm <sup>3</sup> /hr)
Output oxygen pressure	45 PSI (3.1 bar) standard, 55 PSI (3.8 bar) available
Sound level	93 dB(A) at 3 ft (1 m)
Power supply	115 VAC, 60 Hz, 1 Phase, 1A (230 VAC, 50 Hz available)
Operating temp	Min: 40 °F (4.4 °C), Max: 90 °F (32.2 °C)
Oxygen outlet fitting	3/4" FNPT
Oxygen dew-point	-60 °F (-51 °C)
Approximate weight	10,000 lbs. (4,536 kg)
Tank size	660 Gallons (2,498 Liters)
Oxygen concentration	93% +/- 3%
Carbon dioxide limit	≤ 300 ppm
Carbon monoxide limit	≤ 10 ppm
Dimensions	75" W x 57" D x 125" H (191cm W x 145cm D x 318cm H)

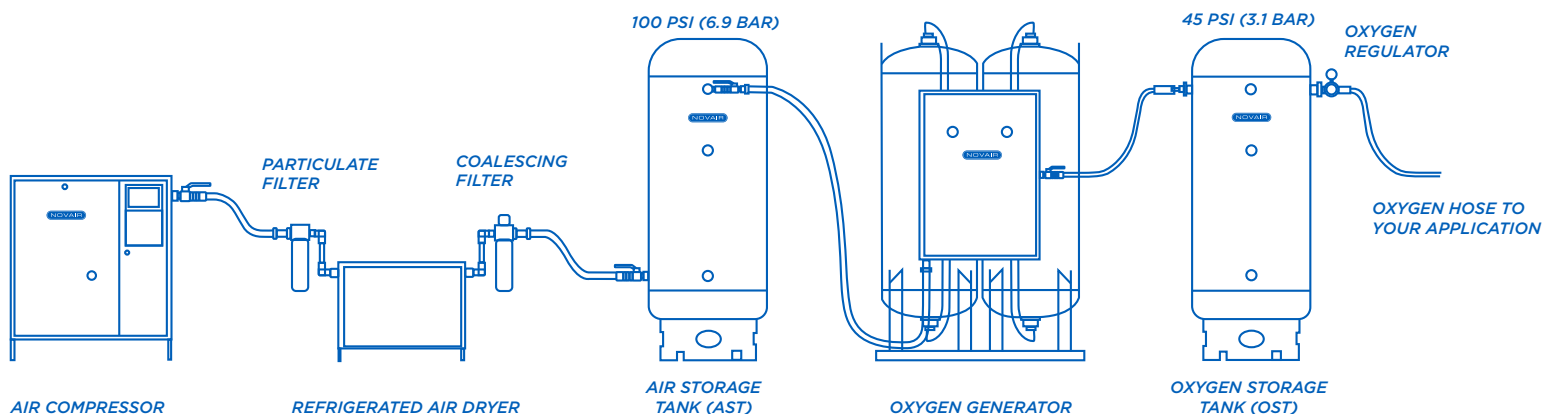

### SPECIFICATION NOTES

- Generators come standard with a 10 ft. flexible inlet air hose and a 10 ft. flexible oxygen outlet hose
- Additional options available -- please speak with a representative to learn more

### TYPICAL APPLICATIONS

- Hospital Systems
- Glass Work
- Waste Gas Remediation
- Metal Forming, Cutting, Brazing
- Ozone Feed Gas
- Fish Farming
- Wastewater Treatment
- Biogas, Semicon, and more

### OXYGEN GENERATING SYSTEM 2000 (OGS-2000) TYPICAL INSTALLATION

\*Disclaimer: NOVAIR's Oxygen Generator (OG) series is not FDA cleared for direct connection to a human healthcare facility oxygen delivery system or for human patient direct use in the USA. NOVAIR operators in human healthcare facilities are wholly accountable for registration as a pharmaceutical manufacturer and for all necessary related quality and safety testing. NOVAIR may assist in set-up and operation of our equipment, but such assistance does not constitute a guarantee of safety and performance related to human medical use of the oxygen generated.
