

OG-3000 Oxygen Generator

3000 SCFH (1415.84 LPM) @ up to 55 PSI (3.8 bar) - Stand alone or part of complete Oxygen Generator System (OGS)

"The industry standard, state-of-the-art, PSA twin tower generator"

AMERICAN-MADE, DEPENDABLE, INDUSTRIAL STRENGTH O₂ GENERATOR

NOVAIR's industry standard oxygen generators utilize the longstanding, highly safe PSA (Pressure Swing Adsorption) process that separates gases in the air, safely ejecting nitrogen while leaving high purity oxygen for a variety of medical and industrial applications. Quickly start producing your own oxygen in-house for just the price of electricity. End O₂ delivery forever while ensuring you always have 93% +/-3% oxygen concentration at up to 55 PSI pressure, wherever and whenever you need it.

Durable "twin tower" tanks filled with zeolite sieve to separate air

Customized output options with ability to create a comprehensive "Oxygen Generating System (OGS)" to meet your specific needs

Clear constant oxygen concentration monitoring readout dials with auto 'continuous' switch. Optional HMI digital touch-screen interface also available.

ADVANTAGES:

- **Savings** - Get a large return on investment in mere months
- **Autonomy** - End delivery, free yourself from constant O₂ rate hikes
- **Reliability** - Works tirelessly in many settings, low maintenance
- **Safety** - No dangerous cylinder transport or worker's comp scares
- **Eco-friendly** - Green technology that lowers your carbon footprint

KEY FEATURES:

- Produce up to 3000 standard ft³ per hour of O₂ in-house, for less
- Output of 93% +/-3% oxygen concentration, continuous flow setting
- Expertly-sealed durable 'twin tower' zeolite sieve beds
- Reliable leading-edge PSA tech, quality-tested, built to last
- Extremely low power consumption, plugs into any 115 VAC power outlet, with 230 VAC input power available at no additional cost
- Worry-free safety features built-in, easy to monitor and maintain
- Can be configured into tailored 'oxygen generating system' (OGS)

OG-3000

Compact skid mount prevents accidents

Compatible with any normal outlet to plug in and start making O₂ for much less than delivery

OG-3000 OXYGEN GENERATOR

PRODUCT DATA SHEET

OG-3000 TECHNICAL DATA

Maximum oxygen flow	3000 SCFH (1415.84 LPM) (84.96 Nm ³ /hr)
Output oxygen pressure	45 PSI (3.1 bar) standard, 55 PSI (3.8 bar) available
Sound level	93 dB(A) at 3 ft (1 m)
Power supply	115 VAC, 60 Hz, 1 Phase, 1A (230 VAC, 50 Hz available)
Operating temp	Min: 40 °F (4.4 °C), Max: 90 °F (32.2 °C)
Oxygen outlet fitting	3/4" FNPT
Oxygen dew-point	-60 °F (-51 °C)
Approximate weight	12,750 lbs. (5,783 kg)
Tank size	1060 Gallons (4,013 Liters)
Oxygen concentration	93% +/- 3%
Carbon dioxide limit	≤ 300 ppm
Carbon monoxide limit	≤ 10 ppm
Dimensions	88" W x 66" D x 150" H (224cm W x 168cm D x 381cm H)

SPECIFICATION NOTES

- Generators come standard with a 10 ft. flexible inlet air hose and a 10 ft. flexible oxygen outlet hose
- Additional options available -- please speak with a representative to learn more

TYPICAL APPLICATIONS

- Hospital Systems
- Glass Work
- Waste Gas Remediation
- Metal Forming, Cutting, Brazing
- Ozone Feed Gas
- Fish Farming
- Wastewater Treatment
- Biogas, Semicon, and more

OXYGEN GENERATING SYSTEM 3000 (OGS-3000) TYPICAL INSTALLATION

*Disclaimer: NOVAIR's Oxygen Generator (OG) series is not FDA cleared for direct connection to a human healthcare facility oxygen delivery system or for human patient direct use in the USA. OG operators in human healthcare facilities are wholly accountable for registration as a pharmaceutical manufacturer and for all necessary related quality and safety testing. NOVAIR may assist in set-up and operation of our equipment, but such assistance does not constitute a guarantee of safety and performance related to human medical use of the oxygen generated.
